

COVER[®] —ONE MASK

CoverOne[®] half-visor is a complementary element of protective clothing and effective replacement for protective visors and disposable masks, recommended for those who appreciate greater comfort of use. It reduces the risk of droplet-borne infections, protects the mucous membranes of the lips and nose as well as face from contact with contaminated hands.

Universal, extremely lightweight and simple half-visor, adjustable with an elastic band, will work perfectly in everyday, long-term use. The visor does not cause chafes or limit the field of view. It can be used during activities that require continuous wearing of masks or their substitutes.

Simple in construction and disinfection, resistant to damages, handy half-visor can be used multiple times and is a perfect replacement for disposable masks.

- easy to maintain
- extremely lightweight
- full transparency
- durable
- does not cause burns and abrasions
- allows you to wear glasses
- facilitates breathing while protecting nose and mouth
- made of durable materials that can be disinfected multiple times
